

Don't shoot the messenger

Up-to-date reporting of consumer product injuries using an interactive dashboard

M. Versteeg, I. van Wijk, D. Heijting, S. Nijman. Consumer Safety Institute, the Netherlands

Aim

Achieve a shift from passive to active surveillance for product-related injuries

How to get there

Via an interactive reporting tool (using Power BI service) combined with an online Data Warehouse cloud (Azure based)

References: Allegrante JP et al. *Injury surveillance: the next generation*. Injury Prevention 2016; Radovnikovic A et al. *Assessment of the opportunities for increasing the availability of EU data on consumer product-related injuries*. Injury Prevention 2021.
